Hot Stone- Hot stone massage provides both deep relaxation and therapeutic benefits in one treatment. Smooth, heated stones are gently glided over the body to ease muscle tension, promote relaxation, and improve blood circulation.

Deep Tissue- Offers a massage technique to target the deepest layer of muscles & connective tissue in order to release knots and ease chronic muscle tension.

Relaxation- A smooth, gentle, flowing style that promotes relaxation, relieves muscular tension, plus improves circulation, and range of movement.

Therapeutic- Target's areas of discomfort in the body. Therapeutic massages use a range of pressure & techniques to focus on pain relief, relaxation and stress reduction.

Stretch- Our stretch massage will incorporate a good amount of full body stretching techniques to increase flexibility, range of motion and aid in pain relief.

Prenatal- (Must be after 1st trimester) Prenatal massage requires different techniques, but provides the same wellness benefits to relieve stress and relax muscles. *(Massage offered only while laying on side).*
